CAA-M BIMETALLIC CONNECTORS copper palm fixing - aluminium barrels

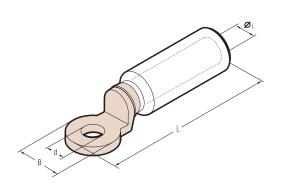

Description:

- The barrels of series CAA-M connectors are made from aluminium of a purity equal to or greater than 99,5%. The cross sectional area of the annulus and the length of the barrel are designed to assure an extremely reliable electrical connection.
- The palm fixing is manufactured from electrolytic copper 99,90%.
- The barrel is friction welded to the palm thus achieving the best possible transition between the copper palm and aluminium barrel.
- The internal surface is duly protected against the oxidation through a specific grease with a very high dropping point.
- They are studied for connecting aluminium cable of low and medium voltage.

| FEATURES OF THE MATERIAL | | | | | | | |
|---|-------------------|-------------------|--|--|--|--|--|
| PART | BARREL | PALM FIXING | | | | | |
| DESIGNATION | AI 99.5 | Cu ETP CW 0041A | | | | | |
| STANDARD OF REFERENCE | UNI EN 573-3:2013 | UNI EN 13601:2013 | | | | | |
| PARAMETERS | | | | | | | |
| ELECTRICAL RESISTANCE AT 20 °C (μΩ•cm) | 2,874 | I,724÷I,70 | | | | | |
| BREAKING RESISTANCE (N/mm ²) | 85÷129 | 225 | | | | | |
| STRETCHING A5 % | 10÷23 | 35 | | | | | |

Sections and dimensions:

| Conductor Size Ø sqmm mm | | Ref | Dimensions mm | | | | Quantity |
|--------------------------------------|--------------|-------------------|---------------|-------|-------|----------|----------|
